-

PROFESSIONAL EXPERIENCE

IT Executive | CW YCI PVT LTD – On-site | May 2025 – November 2025

- Managed and maintained IT infrastructure including networks, hardware, and software systems across the organization
- Provided first-level technical support to end-users on-site, diagnosing and resolving hardware, software, and network issues promptly

- Administered user accounts in Active Directory and Office 365, including account creation, password resets, and access permissions management
- Managed SLA compliance and ticket handling using ticketing systems, ensuring accurate documentation and tracking of all reported issues
- Troubleshoot networking issues including LAN/WLAN connectivity, TCP/IP configuration, DNS, and DHCP problems
- Executed routine system maintenance, software updates, and security patches to ensure optimal system performance and data integrity
- Supported employee onboarding by setting up equipment, configuring workstations, creating user accounts, and installing printers and peripherals
- Maintained IT asset inventory and coordinated procurement of IT equipment
- Developed and maintained IT documentation, policies, and procedures
- Escalated complex issues to senior IT teams with detailed technical documentation
- Coordinated with external vendors and service providers for IT-related services

IT Support Engineer & Technical Solutions Specialist | NODE LYNX – Remote | February 2024 – April 2025

- Served as primary IT support contact for over 50 end-users daily via phone, email, and remote support tools, achieving under 10-minute average resolution time
- Installed, configured, and maintained computer systems, printers, and peripherals across Windows 10/11, macOS, and Linux environments
- Administered user accounts through Active Directory and Office 365, managing account creation, modifications, and access controls
- Implemented network security measures and data backup procedures to ensure data integrity and optimal uptime
- Documented and tracked all issues using ServiceNow and Zendesk, maintaining accurate records for reporting and escalation
- Troubleshoot connectivity issues across LAN/WLAN environments including TCP/IP, DNS, and DHCP
- Performed routine maintenance and assisted with implementation of system upgrades and new technologies
- Maintained over 95% customer satisfaction ratings while providing support across multiple time zones

IT Support Representative & Technical Solutions Associate | DMS – Malabe, Sri Lanka | November 2022 – December 2023

- Delivered first-level technical support to over 200 international technology clients, achieving 95% customer satisfaction through first-call resolution
- Diagnosed and resolved hardware, software, and network issues via phone, email, and remote support tools
- Managed IT asset lifecycle including hardware installation, software deployment, printer setup, and peripheral configuration

- Assisted with onboarding new employees through equipment setup, account creation, and system configuration
 - Handled user account management and access controls, ensuring security compliance
 - Documented and tracked all support cases using ticketing systems and maintained accurate asset records and issue histories
 - Performed routine system maintenance, software updates, and proactive maintenance schedules
-

EDUCATION

Bachelor's degree in software engineering | ESoft Metro Campus | September 2022 – November 2025

Relevant Coursework: System Administration, Network Administration, IT Service Management, Hardware Configuration, IT Infrastructure Management, Information Security

CERTIFICATIONS & TECHNICAL QUALIFICATIONS

- IT Infrastructure Management and System Administration
 - Network Security and Data Protection Protocols
 - Google Workspace and JIRA Administration
 - Hardware Installation and Configuration
 - IT Service Management and Help Desk Operations
-

PROJECTS & LEADERSHIP

International IT Support Manager | Innovation Challenge 2023 | November 2023 – December 2023

Managed IT support teams delivering technical assistance to clients in Europe and the USA. Implemented network monitoring procedures ensuring 99.9% uptime. Developed troubleshooting frameworks for hardware, software, and network connectivity problems.

IT Infrastructure Team Lead | Google Developer Students Club 2022 | June 2022 – July 2022

Led an IT support team on infrastructure best practices and system administration. Coordinated network setup, Google Workspace deployment, and asset management across the organization.
